Problem Statement

The TrackDay application, available on both web and mobile platforms, aims to serve as a central hub for motorsport enthusiasts, providing access to a variety of services and features. However, its limited functionality and usability hinder its effectiveness in engaging users and fostering a deeper interest in motorsports.

Target User Profile

The TrackDay application targets motorsport enthusiasts, including both seasoned participants and newcomers interested in developing a passion for motorsports. By engaging a diverse group of users from various backgrounds and experience levels, the application aims to gather comprehensive insights that will guide enhancements to its features, ultimately improving the overall user experience for all motorsport aficionados.

Research Objectives

- To evaluate the TrackDay application's usability and accessibility for motorsport enthusiasts.
- To identify specific challenges and issues users encounter when accessing essential features within the TrackDay app.
- To determine the types of information and functionalities that users most frequently seek and utilize through the application.
- To understand the overall user experience of individuals when navigating, interacting, and engaging with the TrackDay application.
- To explore ways to enhance the TrackDay app based on user feedback and suggestions, and to develop recommendations for improving the application to better serve their needs and promote their engagement with motorsport activities.

Tasks

Task 1: Account Creation

You are a new user eager to join the Trackday community. Begin by downloading the Trackday application and proceed to create a personal account.

Task 2: Joining a Club

As a motorsport enthusiast, you want to connect with like-minded individuals. After logging into the Trackday app, navigate to the 'Clubs' section and join the 'Trackday Community Club' or any other club that aligns with your interests.

Task 3: Exploring Club Media Content

Curious about the activities of your chosen club, you decide to explore its media content. Access the club's page within the app and browse through the available images and videos shared by club members.

Task 4: Connecting with Club Members

To build your network, you aim to connect with fellow club members. Within the club's page, locate the list of members and send connection requests to individuals you'd like to connect with.

Task 5: Utilizing the 'My Garage' Feature

You wish to showcase your vehicles within the app. Access the 'My Garage' feature to understand its functionalities and details.

Tasks

Task 6: Engaging in Community Discussions

Interested in community discussions, you decide to participate in the forums. Navigate to the forums section of a community you're part of and read through recent discussions. Try to see if you can contribute to a topic by posting a comment or starting a new thread.

Task 7: Discovering Relevant Blogs

Looking for insightful reads, you explore the app's blog section. Find and read blogs that match your interests, and consider subscribing to authors or topics for future updates.

Task 8: Reviewing Connections and Club Memberships

You want to review your network within the app. Access your profile to find information on the number of connections you have and the clubs you've joined.

Task 9: Interacting with the Feed

To stay updated, you check the app's feed. Browse through recent posts, create a new post sharing your latest track experience, and interact with existing posts by liking, commenting, or sharing.

Task 10: Seeking Support for Application Issues

Encountering an issue within the app, you decide to seek assistance. Use the app's support feature to report the problem or ask for help, ensuring you follow the provided steps to submit your query.

Testing Plan/Instructions

Pre-Test Preparation:

- Zoom Setup:
 - Join Meeting: Access the designated Zoom meeting link provided.
 - Enable Screen Sharing: Click "Share Screen" and select the window displaying the Trackday app.
 - Activate Camera: Start your video to allow observation of facial expressions.
 - RECORD THE MEETING
- Timing Tasks:
 - Use a Stopwatch: Have a stopwatch or timer ready on a separate device.
 - Record Duration: Start the timer just before beginning each task and stop immediately upon completion. Note the time taken for each task.

2. Think-Aloud Protocol:

- Verbalize Thoughts: Continuously articulate your thoughts, actions, and feelings as you navigate the app.
- Express Challenges: Clearly state any difficulties or confusion encountered during tasks.
- Maintain Consistency: Keep talking throughout the session to provide insight into your user experience.

For a brief demonstration of the think-aloud method, you may find the following video helpful:

		IN: Insight DI: Design Idea US: User Statement BS: Bug/Software issue Q: Question UI: User interface issue
KEO-01-TASK1	Clicked on create an account twice and kept getting redirected to the homepage	BS
KEO-01-TASK1	" maybe I need to clear my cache or something like that"	Q
KEO-01-TASK1	He tried a new browser (chrome) then it still did not work, the user after trying several ways on the chrome browser he thought of creating the account on his phone mobile app version then accessing the account on his laptop. the user found the clubs page, however he was confused about whether or not he joined a club after clicking on the become a member button because when he hovers it says leave club	BS
KEO-01-TASK2	The user tried to join another club and they found and after clicking the button, the button text updated to "request sent".	UI
KEO-01-TASK2	The user tried to undo their request and he could not accomplish that	UI
KEO-01-TASK2	He said, " How would I undo that " when he saw he did not instantly become a member	Q
KEO-01-TASK2	" I Can't undo my request, what do I do ? "	Q
KEO-01-TASK2	"I guess I will have to wait for them to accept or deny and if I have to leave later "	US
KEO-01-TASK3	The user clicked on the view all meetups in the Trackday community club page and was redirected to page not found	BS
KEO-01-TASK3	The user saw the latest discussion section and said it is like a group chat and no one is typing anything	US
KEO-01-TASK3	"It is either more like a group chat or more like a news feed or like a facebook group ", the user referring to the discussion section	US
KEO-01-TASK3	The user referred to the reply button as broken without clicking on it, mainly due to how it looks and how the text is wrapped	UI
KEO-01-TASK3	" A lot of people joining and no posts, it is annoying, I want to see more posts not people joined"	US
KEO-01-TASK3	The user was at the news feed page on the web application and the title of the tab says " page not found "	BS
KEO-01-TASK4	The user asked if he is connecting with people accounts or connecting with them in the club page/account	Q
KEO-01-TASK4	The connect button takes a while to load but it is fine	US
KEO-01-TASK5	The user clicked on the Trackdays link on the nav bar looking for my garage and was redirected to page not found	BS
KEO-01-TASK5	The user clicked on the meetups link on the nav bar looking for my garage and was redirected to page not found	BS
KEO-01-TASK5	The user first thought that my garage will be part of a club/community	IN
KEO-01-TASK5	The user tried to then search my garage using the search bar and it was redirected to page not found	BS
KEO-01-TASK5	The user eventually found the my garage and accessed it, however when he clicked on the Add Vehicle button, he was redirected to page not found	BS
KEO-01-TASK5	The user thought the add vehicle button link does not work because of a browser problem	US
KEO-01-TASK6	The user first goes to message instead of accessing clubs first, then he searches for community. It took a user a while to realise club and community they were the same thing	IN
KEO-01-TASK6	Then he searches for forums using the search bar, only to realise it is also clubs	IN
KEO-01-TASK6	The user tried to engage in a discussion forum in a club he is not a part of. then he realised, he needs to be a member first	IN
KEO-01-TASK7	" Right away I do not know where blogs at "	US
KEO-01-TASK7	The user searches up blogs in the news feed, finds a link when they click it, it was redirected to page not found	BS
KEO-01-TASK7	The user searches up blogs in the main search bar, then they find a link when he clicks it, it was redirected to page not found	BS
KEO-01-TASK7	is members joined displayed in the discussion forums section for the trackday community/club. I can see them because I am in the club or is it public to everyone or I can see them because I am member in the club. Because if it is public to everyone, then what is the point of me joining the club	IN
MODERATOR TASK 7	The user in Task 7 was very confused and unsure about where he is going. The user felt the only use for joining a club would be to con	Q
KEO-01-TASK7	" I don't see blogs, maybe it is in inbox ? "	IN
KEO-01-TASK8	why the text for vehicles and my clubs at the profile page so small	
	The user realised that the button for the clubs page when it says become a member, it would send a request and when it says "join a club". he could join right away	
MODERATOR TASK 8	where I am going ?	Q
MODERATOR TASK 8	The user showed very high confusion doing this task, unsure where he needs to go and tried accessing many several places to accomplish this	
KEO-01-TASK8	The user clicks on members link/button on the navbar, then scrolling through members they realise there is a difference between following and connecting with a member	IN
KEO-01-TASK8	The user after accessing members tries to see if he could his phone and from the mobile version see if he can access those features, then after a while he suddenly sees the my connections in the my members page and access it, then he thought he could maybe find his connections at the Profile page and he doesn't find that	DI
KEO-01-TASK9	The user tried to like posts in the feed section some like buttons would not work and some when the user clicks he would make the like button loop incrementing and adding likes non stop	BS
KEO-01-TASK9	The user was able to comment but when he replies to a comment and refresh, he would not find the reply	BS
KEO-01-TASK10	The user searches support in the search bar, finds a link. When he clicks the link. He was redirected to page not found	BS
KEO-01-TASK10	The user tries to look for it in other places in the app still does not find it

		IN: Insight DI: Design Idea US: User Statement BS: Bug/Software issue Q: Question UI: User interface issue
MEL-02-TASK1	The user suggested adding a 'confirm password' textbox to improve password awareness.	DI
MEL-02-TASK3	Initially lost due to the feed of users, but found 'photos' and 'videos' near the top. Suggests combining buttons (photos, videos) into a single table with filter options.	DI
MEL-02-TASK9	Interacting with the feed was intuitive with liking and commenting features. Suggested changing the 'Create Post' button to a '+' icon for consistency with platforms like Instagram or TikTok.	DI
MEL-02-TASK5	The user initially looked for 'My Garage' at the bottom bar, then found it under 'More'. Clicking it caused a critical error.	BS
MEL-02-TASK7	Blogs were located near Forums but produced the same critical error as 'My Garage'.	BS
MEL-02-TASK10	The user could not locate support features after searching Profile, More, Privacy settings, etc. Suggested adding visible support options such as contact email or phone number.	BS
MEL-02-TASK1	The user found the 'sign up' button intuitive and formatted as expected. The email verification process was smooth.	US
MEL-02-TASK2	The user easily located the 'clubs' button and joined the Trackday community without issues.	US
MEL-02-TASK4	Connecting with club members was simple by clicking on their profile picture, and the 'connect' button stood out.	US
MEL-02-TASK6	The user struggled to locate Forums, eventually finding them hidden under 'More'. Suggests making Forums visible on the front page due to their importance.	US
MEL-02-TASK8	The user easily found connections and club memberships under the Profile section.	US

User-ID	Notes	Category
		IN: Insight DI: Design Idea US: User Statement BS: Bug/Software issue Q: Question UI: User interface issue
JESSIE-03-TASK1	User nickname has been taken, error message popup and was redirected to rename the nickname	IN
JESSIE-03-TASK1	The user suggests password strength, and a secure password requirement/recommendation should be enforced	DI
JESSIE-03-TASK2	User easily located "Clubs" and found joining and requesting access to join private clubs to be smooth and easy	US
JESSIE-03-TASK3	User navigated to Nicks newsfeed, photos are not loading "if my internet is slow", cannot view photos even after a few seconds of browsing feed.	BS
JESSIE-03-TASK3	Tried to click on followers, and following words/number in Profile page, "was expecting that I can see who was connecting with Nick"	UI
JESSIE-03-TASK3	User navigated to videos Nick has posted and came across an issue, "Video format is not supported"	BS
JESSIE-03-TASK3	User interacts with a video, and comments. Had issues with closing the comments page.	UI
JESSIE-03-TASK3	"not sure if Nick will see my photo" user tried to post a photo in the comments the process did not go through. Not able to upload file from phone"	BS
JESSIE-03-TASK3	Re-attempted to close comments page, by scrolling the page downwards to close (as indicated by the bar above the field). Closed by pressing "del"?	UI
JESSIE-03-TASK3	User navigated to photos "takes time to see the photos", "would like to see quicker, it'll be good", "still quite slow, don't like that"	BS
JESSIE-03-TASK3	Navigates to album, photos in the albums load quicker "now i know that, that's good"	US
JESSIE-03-TASK3	User navigates to forums, when browsing above the tabs "nothing is listed"	US
JESSIE-03-TASK3	Error message popped up quickly, user wasn't able to see - "couldn't see"	UI
JESSIE-03-TASK3	When wanting to invite members to Trackday community user tries to select members but cannot find an 'invite' button. User says it "might be because I don't have any connections so far"	UI
JESSIE-03-TASK4	User navigates to members in Trackday Community again, comes across same page when trying to invite members. Unable to 'submit' the member they want to invite and feels "confused"	UI
JESSIE-03-TASK4	Navigates to members in Trackday Community club to send connection requests, pop-up message "connection request canceled" shows up and doesn't recognise	UI
JESSIE-03-TASK5	Navigates to "My garage" with no issues, went clicking comes across 'critical error on this website', user states "technical error, cannot see picture", "technical issue with me"	IN
JESSIE-03-TASK6	When looking for Discussions, went into 'Clubs' first before correcting and going into 'More'	UI
JESSIE-03-TASK6	Navigates to first post in 'Discussions', cannot interact or comment as listed as 'Private Discussion', User believes "because no connections, cannot communicate"	US
JESSIE-03-TASK6	"don't know how to make a post"	US
JESSIE-03-TASK7	Navigates to blog easily, page displays "critical error on website"	BS
JESSIE-03-TASK7	User successfully adds comment, but unsure if anyone can view it	UI
JESSIE-03-TASK8	Confusion between 'Connections' and 'Followers/Following'	IN
JESSIE-03-TASK9	Attempts to send a photo in the comments, and cannot submit photos.	BS
JESSIE-03-TASK9	Deletes comment successfully, "alert was too quick"	UI
JESSIE-03-TASK10	Wonders if we could input an email address, phone number or have an optional for online chatting to resolve problems	DI

User-ID	Notes	Category
		IN: Insight DI: Design Idea US: User Statement BS: Bug/Software issue Q: Question UI: User interface issue
EDEN-04-TASK2	"I think that's it." User stated after he joined the Trackday Community club, and seeing if there was any other clubs he needed to join.	US
EDEN-04-TASK2	He said, "I can also join the one with 25 members, and that's requested," after scrolling for a bit and requested to join the Classic Skylines Australia, confirming that it was requested after the "Request to Join" button changed to "Requested".	
EDEN-04-TASK3	User went into the photos section of Trackday Community club, and saw that all the listed pictures were black and not loaded, and only loads when the picture is expanded. The list of pictures remains black and unloaded even after the user exits out of the expanded picture.	BS
EDEN-04-TASK3	User said, "not sure if they are- oh there they are," as he was about to question the lengthened time it took for the expanded picture to load, but cut off after the picture loaded	IN
EDEN-04-TASK4	"Can't connect with the moderator and the organizer." User stated as he clicked on the elipsis button next to Nick's (organizer) and Soren's (moderator) name, but nothing happens	UI
EDEN-04-TASK4	"So I can connect to other people." He stated as the elipsis buttons to other member's names were responsive	US
EDEN-04-TASK4	"Can I follow them?" he questioned, realising he couldn't connect with the moderator or organizer	Q
EDEN-04-TASK4	User said, "oh, I can connect," as he backtracked to the moderator's button, and worked on the second attempt	US
EDEN-04-TASK4	User tried to click on organizer's elipsis button, but still didn't work.	BS
EDEN-04-TASK4	The user mentioned that "it's so slow," after failing to get the organizer's elipsis button working, and getting a delayed response after multiple clicks on the organizer's (Nick) name, which took the user to Nick's profile page twice after some time.	IN
EDEN-04-TASK5	He said, "also my profile... no, so its only in more," as he was confused that the "My Garrage" feature is not in his profile section but in the "More" section	IN
EDEN-04-TASK5	User tried to access "My Garrage" feature twice but gets an error	BS
EDEN-04-TASK6	User thought he was not able to add a discussion in the club's discussion on first impression, but eventually finds the place to add a discussion through the elipsis button	IN
EDEN-04-TASK6	"It's like Facebook where I'll type stuff in," was how the user described the discussion creation page	US
EDEN-04-TASK7	"It's hidden in 'More' menu again," he stated as he struggled to find the blogs section for some time	IN
EDEN-04-TASK7	"I think it's taking too long to load," he assumed after waiting for a prolonged peroid of time on the blogs and with nothing loaded	BS
EDEN-04-TASK8	"I think I can check my connection through members." User assumed that he could find people that he has connected with in the Trackday Community club's members section	US
EDEN-04-TASK8	User said, "Okay, sort of makes sense," after realising that his connections and clubs are located in "My Profile" section	US
EDEN-04-TASK9	User stated that the process to interact with posts, like comments, and create posts in the news feed is "pretty straight forward."	US
EDEN-04-TASK10	User assumed that the section for feedback submission inside "More" section was the place to send support for application issues	IN

user 5

User-ID	Notes	Category
		IN: Insight DI: Design Idea US: User Statement BS: Bug/Software issue Q: Question UI: User interface issue
ABHISHTA-04-TASK1	Engaging website landing page. The 'Join us for free' button is prominent, sometimes the button's colours blend in with the background but still clear enough	IN
ABHISHTA-04-TASK1	Join Us For Free' button can have a simple white border button on the Trackday gradient background to make it stand out more	DI
ABHISHTA-04-TASK1	Creating a profile is pretty straightforward. The desktop version auto generated a user name which couldn't be edited	IN
ABHISHTA-04-TASK1	Potential to generate editable username for desktop?	Q
ABHISHTA-04-TASK1	Verification of the account was a difficult task when the account was created on web. Tried clearing cookies and cache and tried different browsers but nothing worked. Had to create an account on mobile first to verify that and then log in on the web version.	BS
ABHISHTA-04-TASK2	Default page is 'Newsfeed' which is unclear due to the navigation menu on the right hand side	IN
ABHISHTA-04-TASK2	The navigation menu can be changed to fit the visual hierarchy of information	DI
ABHISHTA-04-TASK2	Join Club' is prominent and clear.	IN
ABHISHTA-04-TASK2	The club profile and 'about' sections can be clubbed to make the whole thing as an 'About' section	DI
ABHISHTA-04-TASK2	Navigation options increase after joining the club as there are more features to access	IN
ABHISHTA-04-TASK2	Add A Vehicle' is pretty easy and straightforward. Can send invites to add more people to the club. Lots to explore in the 'Clubs' section so it keeps the user engaged	IN
ABHISHTA-04-TASK3	How to make the 'Clubs' section less FB-like and more interactive and engaging?	Q
ABHISHTA-04-TASK4	Vehicles' and 'Clubs' upfront on user profile which is handy	US
ABHISHTA-04-TASK4	Easy to add a member through 'Clubs' as well as through 'Members'	IN
ABHISHTA-04-TASK4	Going back to where I started off is a lengthy process as the navigation bar on the right considers each click as a new page	BS
ABHISHTA-04-TASK4	A better structure and architecture would help mitigate this problem	DI
ABHISHTA-04-TASK5	Good to have an explanation to the vehicle privacy section, explaining what each of them mean	US
ABHISHTA-04-TASK5	A major issue where people would get stuck is adding pictures for the vehicle, since there is a sizing restriction	IN
ABHISHTA-04-TASK6	Hard to find the Forums section upfront on web. The only way to get to Forums is through My Profile and you can't create any forums there	IN
ABHISHTA-04-TASK6	You can create forums after being a premium member. However that's not clear enough on first interaction. If creating a forum is a premium feature, it should be created that way	DI
ABHISHTA-04-TASK6	Newsfeed' and 'Latest Discussions' are the same feature on the website but have different names which lacks consistency	IN
ABHISHTA-04-TASK6	Unsure of what 'My Account' does on the web app	
ABHISHTA-04-TASK6	Upon creating or editing a post, the 'Save' button has a function to post or edit stuff. However visual hierarchy wise, the placement is over the written text and now below, once you're done wriying	
ABHISHTA-04-TASK6	No members who are connections are directly visible through profile. Can see it through the 'Members' section.	IN
ABHISHTA-04-TASK6	Maybe a list of Followers included next to 'Following'. Just to make sure even if it's 0, it's still something	DI
ABHISHTA-04-TASK7	Blogs are not upfront so becomes difficult to find them unless one knows what they are looking for. Just a search result with keywords will not be enough	IN
ABHISHTA-04-TASK7	No Support function visible/available on web. Much quicker and easier to do this on mobile	IN

KEY Findings

TASK1

You are a new user eager to join the Trackday community. Begin by downloading the Trackday application and proceed to create a personal account.

The Key Discovery

Software/Bug Issue: Users encountered multiple redirections to the homepage and errors during account creation. Verification issues occurred, especially when switching between mobile and desktop versions, leading to confusion and frustration.

UI/UX Issue: Users struggled with unclear steps during account creation. Automatic username generation was not intuitive, and there were issues during the verification process.

The Why

Account creation was hindered by browser compatibility problems, unclear verification steps, and unclear visual cues. These factors caused users to get stuck or abandon the process.

The Consequence

If users encounter issues during account creation, they are likely to abandon the process entirely, which could lead to reduced user registration and engagement rates.

Time taken for Task 1 - Account Creation

The image shows two versions of the 'Create account' form. On the left is a mobile view with a purple gradient background and white text. It includes fields for Email, Password, First Name, Last Name, and Nickname, each with a placeholder text. Below these fields is a 'Create Account' button and a link to 'Terms of Service and Privacy Policy'. On the right is a desktop view with a white background and blue accents. It includes fields for Email Address and Password, a 'Remember Me' checkbox, a 'Forgot Password?' link, a 'Log In' button, and a 'Terms & conditions and Privacy Policy' link. At the bottom, there is a language selector set to 'English (Australia)' with a 'Change' button.

TASK2

As a motorsport enthusiast, you want to connect with like-minded individuals. After logging into the Trackday app, navigate to the 'Clubs' section and join the 'Trackday Community Club' or any other club that aligns with your interests.

The Key Discovery

Software/Bug Issue: Users faced broken links and redirections when attempting to join clubs. Some users believed they had joined but were uncertain about their status due to lack of feedback.

UI/UX Issue: Lack of clear visual or textual feedback on the status of a club join request led to confusion. Users also struggled to undo requests once submitted.

The Why

Users didn't receive immediate or clear confirmation about their club membership status, leading them to believe they had succeeded when they hadn't. The lack of undo functionality also caused frustration.

The Consequence

Users might abandon the club-joining process or feel disengaged from the community if they aren't clear on their membership status. This reduces user participation and community growth.

Time taken for Task 2 - Joining a Club

TASK3

Curious about the activities of your chosen club, you decide to explore its media content. Access the club's page within the app and browse through the available images and videos shared by club members.

The Key Discovery

Software/Bug Issue: Critical errors occurred while accessing media content. Images often failed to load or displayed incorrectly, with some sections remaining blank until expanded.

UI/UX Issue: Users found it frustrating to have to expand images to view them and were delayed by slow loading times for photos and videos.

The Why

The media section had performance issues and lacked clarity in how images and videos were presented. The slow load times and inability to view content without expanding caused delays.

The Consequence

If users cannot engage with media content quickly or if images/videos don't load correctly, they may become frustrated and disengage, leading to lower user interaction with the club's content.

Time taken for Task 3 - Exploring Club Media Content

TASK4

To build your network, you aim to connect with fellow club members. Within the club's page, locate the list of members and send connection requests to individuals you'd like to connect with.

The Key Discovery

Software/Bug Issue: Users experienced issues with the ellipsis button not functioning when trying to connect with moderators or other members.

UI/UX Issue: The process for connecting with other members wasn't clearly communicated, and users were unsure how to initiate or track their connection requests.

The Why

Unresponsive buttons and unclear steps to connect with others caused confusion. The lack of feedback on connection attempts made it difficult for users to know whether their actions were successful.

The Consequence

If users cannot easily connect with others, they may feel isolated from the community, leading to decreased usage of social features and lower engagement levels.

Time taken for Task 4 - Connecting with Club Members

TASK5

You wish to showcase your vehicles within the app. Access the 'My Garage' feature to understand its functionalities and details.

The Key Discovery

Software/Bug Issue: Users encountered critical errors when trying to access the “My Garage” feature. Many users also struggled with finding this feature due to its placement under the “More” menu.

UI/UX Issue: The feature’s location wasn’t intuitive, and users had difficulty finding or interacting with the content within the garage.

The Why

Support features were not prominently displayed or accessible, which hindered users from quickly resolving issues. Lack of clear guidance led to confusion about where to seek assistance.

The Consequence

If users cannot easily find support or resolve issues, they may abandon the app or become frustrated, which could negatively impact user retention and satisfaction.

Time taken for Task 5 - Utilizing the 'My Garage' Feature

My Garage

Description

Test Vehicle

TASK6

Interested in community discussions, you decide to participate in the forums. Navigate to the forums section of a community you're part of and read through recent discussions. Try to see if you can contribute to a topic by posting a comment or starting a new thread.

The Key Discovery

Software/Bug Issue: Users had trouble accessing and interacting with discussions, facing redirections and "page not found" errors.

UI/UX Issue: Forums were difficult to locate, as they were hidden under the "More" menu. Users also struggled to find where they could initiate or reply to discussions.

The Why

The lack of visibility and clarity in how to access forums and discussions caused users to get lost. The poorly organized navigation led to confusion and frustration when trying to engage with community content.

The Consequence

If users cannot easily find or engage in discussions, the app's community-driven features will lose their value, reducing overall user engagement and participation.

Time taken for Task 6 - Engaging in Community Discussions

TASK7

Looking for insightful reads, you explore the app's blog section. Find and read blogs that match your interests, and consider subscribing to authors or topics for future updates.

The Key Discovery

Software/Bug Issue: Users encountered “page not found” errors when attempting to access blogs. This issue was consistent across multiple attempts to search and access blog content.

UI/UX Issue: Blogs were hard to locate, and the search functionality did not return relevant results for users looking for specific content.

The Why

The blogs section was not prominently featured, and the search results often failed to point users to the correct content. This, combined with error messages, led to a poor experience for users.

The Consequence

If blogs are difficult to find or consistently produce errors, users may abandon efforts to engage with content on the platform, which diminishes the value of the app's content offerings.

Time taken for Task 7 - Discovering Relevant Blogs

TASK8

You want to review your network within the app. Access your profile to find information on the number of connections you have and the clubs you've joined.

The Key Discovery

Software/Bug Issue: Users had difficulty viewing their connections and memberships due to unclear navigation in the profile section.

UI/UX Issue: The profile section was poorly organized, making it difficult to view connections and club memberships in a cohesive way.

The Why

The lack of organization and clarity in the profile section made it difficult for users to locate important information about their connections and memberships.

The Consequence

If users cannot easily review their network or memberships, they may disengage from the social features of the app, reducing community interaction and overall retention.

Time Taken for Task 8 - Reviewing Connections and Club Memberships

TASK9

To stay updated, you check the app's feed. Browse through recent posts, create a new post sharing your latest track experience, and interact with existing posts by liking, commenting, or sharing.

The Key Discovery

Software/Bug Issue: Users encountered issues with the like button, including buttons that didn't work or caused continuous increments in the like count.

UI/UX Issue: The interaction buttons (like, comment) were not always responsive, and users struggled to engage with posts effectively.

The Why

The unresponsiveness of the buttons and the technical glitches led to a frustrating user experience, making it difficult for users to interact with the content.

The Consequence

Users may become frustrated with the feed's lack of responsiveness, leading them to avoid interacting with posts, thus decreasing overall content engagement and user satisfaction.

TASK10

Encountering an issue within the app, you decide to seek assistance. Use the app's support feature to report the problem or ask for help, ensuring you follow the provided steps to submit your query.

The Key Discovery

Software/Bug Issue: Users struggled to find support options, often being redirected to “page not found” errors when attempting to access help features.

UI/UX Issue: The support section was not easily discoverable, leading users to spend time searching for ways to report issues or ask for help.

The Why

Support features were not prominently displayed or accessible, which hindered users from quickly resolving issues. Lack of clear guidance led to confusion about where to seek assistance.

The Consequence

If users cannot easily find support or resolve issues, they may abandon the app or become frustrated, which could negatively impact user retention and satisfaction.

DATA INSIGHTS

Lack of discoverability

Users reported difficulty in locating key features like "My Garage" and "Blogs" within the Trackday application, often struggling to find them under menus like "More." This highlights the need for better placement and discoverability of core features.

Unclear icons and labels

Users frequently misunderstood or could not effectively use certain icons and labels, such as the ellipsis button to connect with members or moderators. These unclear icons led to confusion about their functionality and caused users to misinterpret the features.

Inconsistent performance across platforms

Users encountered different issues depending on the platform they were using (mobile vs. desktop). For example, mobile users faced slow load times and media content not displaying properly, while desktop users struggled with broken links and critical errors. This suggests that there may be platform-specific performance inconsistencies that hinder the user experience.

Limited awareness of available features

Some users were unaware of certain features, such as the ability to connect with other members or access specific areas within the community section, indicating that the app's features need to be more visibly presented or better explained.

Prioritization and hierarchy of information

Users expressed a desire for clearer prioritization and hierarchy of information. For instance, users suggested that key features like "Clubs" and "My Garage" should be more prominently displayed, making it easier to navigate the app and find important content quickly. There were also requests for tooltips or contextual guidance to help users understand the functionality of certain elements more intuitively.

Complexity in completing tasks

Users had difficulty completing tasks like joining clubs, interacting with posts, or accessing vehicle privacy settings. The lack of intuitive steps, combined with slow response times or broken links, made these tasks more complicated than necessary, causing frustration and dissatisfaction.

Slow loading times and technical errors

Users encountered significant delays when interacting with media content, such as images and videos, which either loaded slowly or remained blank until expanded. Additionally, "page not found" errors were a recurring issue when trying to access certain pages, such as "My Garage" or blogs. This highlights the need for improved performance and faster load times to ensure smoother user interaction.

Confusion regarding membership and connection processes

Users struggled to understand the steps for connecting with other members or joining clubs, often due to unclear UI elements or lack of feedback. There was also confusion about the membership approval process and whether certain tasks, like posting or commenting, were available depending on membership status. This shows the need for clearer instructions and better feedback throughout the user journey.

KEY RECOMMENDATIONS

Improve the visibility and discoverability of key features

Make critical features like "My Garage," "Clubs," and "Blogs" more discoverable by placing them in more prominent positions within the app, such as on the homepage or navigation bar.

Enhance performance to reduce errors and loading delays

Address the slow loading times for media content, photos, and other key features like "My Garage" and "Blogs." Improve the app's backend performance to ensure seamless access to content across all platforms (mobile and desktop).

Streamline and simplify navigation

Make sure that key sections like "Clubs," "My Garage," and forums are not only accessible but also easy to navigate within the app. Consider adding shortcuts or quick links to commonly used features in the navigation menu or homepage.

Enhance the hierarchy and prioritization of information

Prioritize key actions and features such as joining clubs, viewing media, and connecting with members by placing them in prominent locations within the app, such as the homepage or the primary navigation menu. Organize the content and actions in a way that reflects user needs and preferences.

Improve feedback and error handling

Provide clearer feedback for actions like joining clubs, sending connection requests, and posting in forums. This could include confirmation messages or visual indicators that guide the user on the status of their actions, such as "Request Sent" or "Connection Pending."
